

Android Device Onboarding Instructions

Note: Before connecting your Android device to the FISD BYOD network, please check the following:

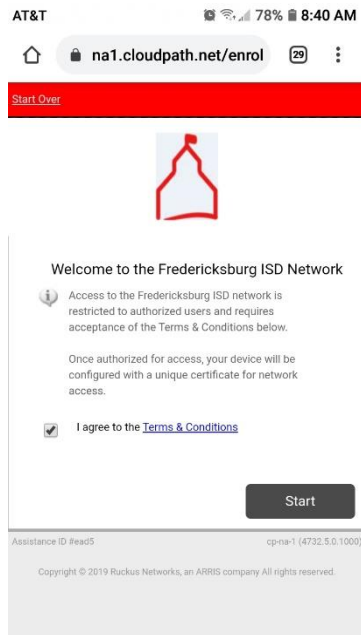

Is this an Android laptop? Make sure you do not have a pop-up blocker enabled.

Did you have the device on BYOD last year?

- If so, navigate to known networks. Go to Settings -> Connections -> Wi-Fi.
- Hold down on the FISD-BYOD network option. Select Forget Network from the list.
- Repeat for FISD-Onboarding if it is listed.

For FISD guests (non-district employee), use the guest credentials provided by your campus or department secretary.

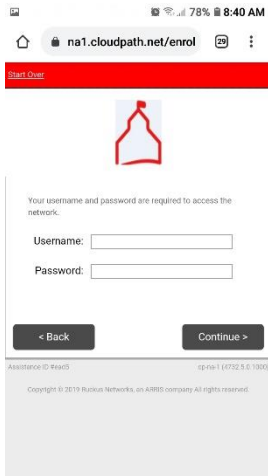

1. In the list of available Wi-Fi connections, select FISD-Onboarding.
2. Open your preferred browser and navigate to 2.2.2.2
3. FISD-Onboarding will redirect you to this page.

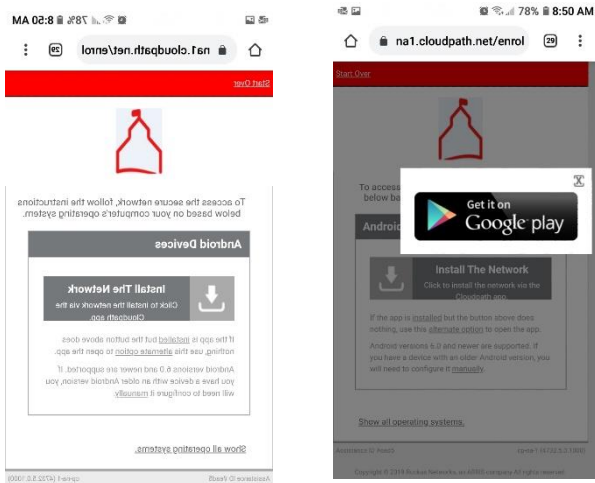

4. Select Start

5. Enter your email address in Username and password for your computer log in.

6. Click Install The Network, then click Google Play to install the application From Google Play

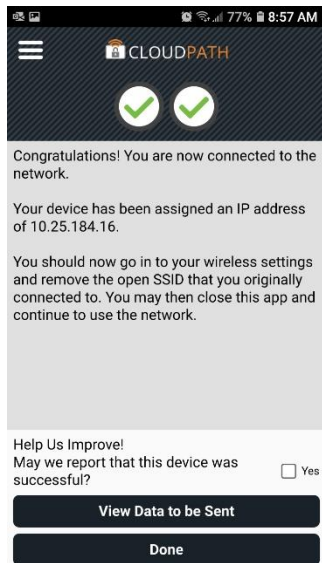

7. After it is installed, go back to your browser and navigate to 2.2.2.2.

8. You will repeat the process listed above and the Cloudpath app will load.

9. Allow Cloudpath access to your location.

10. The Cloudpath app will load your configuration and show a Congratulations screen.

11. Select Done.

12. Open your list of Wi-Fi connects. Hold down on FISD-Onboard and select Forget this Network.
